

KRISHNA YADAV

Varanasi | krishnayadavabc123@gmail.com | 7992153750 | | linkedin.com/in/krishnayadav0218 |

PROFESSIONAL SUMMARY

"Aspiring Data Scientist with hands-on experience in data visualization, machine learning model development, and dashboard creation. Strong proficiency in Python (Pandas, NumPy, Scikit-learn), SQL, and Power BI. Passionate about translating data into actionable insights to support business decision-making."

Education

Babu Banarasi Das University, Lucknow , Master of Computer Applications (MCA) – Data Science	2023 – 2025
Veer Bahadur Singh Purvanchal University , Bachelor of Computer Applications (BCA) – Computer Science	2020 – 2023

Experience

Data Analyst , Own Techno	Feb 2024 – Present
- Analyzing business data using Python, SQL, and Power BI to provide insights. - Automated report generation and dashboarding tasks. - Worked closely with cross-functional teams to support decision-making.	

CERTIFICATIONS

Artificial Intelligence – IBM CEAIA1IN Certificate
Machine Learning – IBM ML0101EN Certificate
Python for Data Science – IBM PY0101EN Certificate
Business Intelligence – IBM CEBIA1IN Certificate
NoSQL Database Essentials – IBM DB0151EN Certificate
Power BI for Beginners – Udemy

Projects

Sales Dashboard in Power BI

- Created interactive dashboards to analyze sales data across regions and time periods.
- Used Power BI for data cleansing, modeling, and visualization.
- Enhanced business decision-making through visual KPIs and actionable insights.

Self-Learning AI for Games (Flappy Bird – NEAT Algorithm)

- Developed an AI agent using NEAT (NeuroEvolution of Augmenting Topologies) to play the Flappy Bird game.
- Integrated the agent with Pygame to simulate game environments and train via neuroevolution.
- Tools used: Python, Pygame, NEAT-Python, Matplotlib.

Quantum (NISQ) systems.

2024

- Simulated QEC protocols using IBM Qiskit and Google Cirq to benchmark fidelity and error rates.
- Designed resource-efficient QEC models with application-specific optimizations for quantum chemistry and optimization problems.
- Addressed challenges like qubit overhead, decoherence, and hybrid QEC-mitigation strategies.

E-Commerce Website Development

2022

- Built a fully functional e-commerce website using HTML, CSS, JavaScript, and PHP.
- Implemented features such as user login, cart, product listing, and payment gateway integration.
- Ensured SEO optimization, mobile responsiveness, and team collaboration for quality delivery.

Technologies

Languages: Python, Java, SQL, MySQL

Libraries/Tools: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow

Data Visualization: Power BI, Tableau, MS Excel

Databases: MySQL, MongoDB

Web Technologies: Basic React.js

AI Models : Chatgpt , Gemini Etc.
